

Maths Through Stories

On a termly basis, our school will now be using Maths Through Stories in order to further engagement, develop learning and to support our children in making mathematical connections throughout a range of topics. Last year, we successfully launched Maths Through Stories within our classes and these books have now been placed within their own section of our new 'Reading Nook' for the children to access! This Term, KS1 classes are using the book 'Busy, Busy, Busy!' and KS2 classes are using the book 'A Remainder Of One' to support their learning.
